

PIENAAR ENERGY (PTY) LTD

Photovoltaic bracket production equipment

Overview

The Photovoltaic (PV) Bracket Production Line is a fully automated solution designed for the mass production of solar mounting structures (solar struts/channels). MASSCA's solar mounting strut channel manufacturing system is a high-performance production solution engineered to fabricate strut channels for solar support structures in multiple specifications, including 41×21 mm, 41×41 mm, 41×62 mm, and 41×82 mm. These structural brackets are extensively used. The *Putai Automatic Solar Panel Mounting Strut Making Machinery*, also known as the Photovoltaic Bracket Roll Forming Machine, is designed to fulfill this need with precision and efficiency. Comprising a 3-in-1 Decoiler Straightener Feeder, a Stamping Press, and a Cold Roll Forming Machine, this line adopts a “Pre-Punching” process. These brackets are the backbone of solar panel support systems, providing strength, durability, and adaptability across various installation scenarios. But how are they manufactured at scale with precision and efficiency?

Enter the PV Mounting Bracket Roll Forming Machine.

Photovoltaic bracket production equipment

Where can I buy photovoltaic bracket production equipment

Taizhou Suneast New Energy Technology Co., Ltd is a high-tech enterprise specializing in solar photovoltaic bracket design, production, installation and related consulting services.
