

**PIENAAR ENERGY (PTY) LTD**

# **Photovoltaic bracket self- introduction example**

## Overview

---

Basic flat roof fixed bracket features: ① Applicable to any specification of crystalline silicon modules and some thin-film modules; ② Pre-embedded anchor bolts on the installation surface, or similar cement foundation; ③ Design the installation angle according to actual needs. The installation structure of solar photovoltaic brackets should be simple, strong and durable. The materials used to manufacture and install photovoltaic arrays must be able to withstand various harsh environments at the project site to ensure 25 years of weather resistance and corrosion. How to write a self-introduction brackets mount solar panels on roofs or other structures. It together with photovoltaic modules, combiner boxes, inverters and other core equipment constitutes a photovoltaic power generation system. [lope such as the roof (tiles), skylights, or facades. cation to maximize the annual energy yield of module.

## Photovoltaic bracket self-introduction example
