

## PIENAAR ENERGY (PTY) LTD

# Photovoltaic container battery inspection

### BASIC APPLICATION

Storage systems have been proven to be "extremely lucrative" for commercial and industrial (C&I) filed.

## Overview

---

Use this checklist to inspect solar photovoltaic and battery energy storage systems. The LumiSolarMobile system is a multi-purpose electroluminescence inspection system for solar cells and solar modules. Micro-cracks, cell failures, inhomogeneities, and other defects which are extremely difficult to detect visually can be detected clearly using LumiSolarMobile. Inspectors should check for any obvious signs of wear and tear, such as corrosion, damaged wiring, or loose. Solar batteries are one of the most important components of a solar PV system, and their proper inspection and maintenance is essential to ensuring the system's longevity and optimal performance. Review site conditions, inverter configuration, DC wiring and isolators, battery management settings, earthing, firmware updates, and required signage to meet AS 5139 and AS 4509. Perform anti islanding checks. Sinovoltaics advice: we suggest having the logistics company come inspect your Battery Energy Storage System at the end of manufacturing, in order for them to get accustomed to the BESS design and anticipate potential roadblocks that could delay the shipping procedure of the Energy Storage System.
