

PIENAAR ENERGY (PTY) LTD

Photovoltaic panel cleaning cycle

Overview

How often is cleaning solar panels necessary?

For residential systems, a visual inspection is recommended every 6 months and a washing of the solar panels at least once a year. For a large-scale photovoltaic power plant with a large number of modules, the time suitable for the cleaning is short each day; it is. Regular cleaning gets rid of grime, pollen, bird droppings, and salt buildup, bringing your panels back to peak performance. This comprehensive guide establishes your personalized maintenance schedule to maximize energy production while optimizing maintenance costs across all US regions.
