Overview

NLR maintains a chart of the highest confirmed conversion efficiencies for champion modules for a range of photovoltaic technologies, plotted from 1988 to the present. Learn how NLR can help your team with certified efficiency measurements. Over the years, several PV models have been proposed in the literature to achieve the simplified. This report presents a performance analysis of 75 solar photovoltaic (PV) systems installed at federal sites, conducted by the Federal Energy Management Program (FEMP) with support from National Renewable Energy Laboratory and Lawrence Berkeley National Laboratory. High-efficiency panels typically have ratings between 15% and 22%.
