

**PIENAAR ENERGY (PTY) LTD**

# **Photovoltaic panel counterweight fixing method**

## Overview

---

Steve Humphreys, Technical Commercial Manager at NAPIT, provides a guide on how to fix PV arrays to on-roof solar photovoltaics systems. In this article, we will look at a simplified wind uplift calculation to determine how many fixings would be required for the array mounting system. One of the. The fixings for solar panels have a very clear purpose: to support the photovoltaic panels by means of a firm and resistant anchorage capable of withstanding any environmental circumstance. The average residential PV panel measures about 1. Including mounting equipment will add about 20kg to your roof. For a full 6kW array, you will need about 20 panels, adding about 365kg of. Solar installations are a fundamental part of the transition to a more sustainable future, which is why INDEX® – A PERFECT FIXING offers specific solutions for the fast safe assembly of both industrial and residential installations, with its coplanar and triangular systems, designed to withstand. The solar PV panels are going to be: ground mounted. Simply because. How do you fix a PV system to a flat roof?

There are two fundamental options for fixing a PV system to a flat roof, ballasted or mechanical. A ballasted system adds additional weight to anchor the array to the roof whereas mechanical installations cover two key methods, either they are fixed to the.
