# **Photovoltaic panel cutting machinery**

## Overview

---

Die-cutting machines are used in the production of solar panels, which are the primary components that convert sunlight into electricity. Together with our manufacturing partners, we offer state-of-the-art fully-automated and semi-automated Solar/PV modules production lines, designed to fit any capacity and factory size. Hole punching tools can be customized according to customer requirements, such as types of flat hole. The ECOLAS CELL A is a fully automatic laser scribing machine designed to enhance solar cell manufacturing with unprecedented precision and efficiency. In our ongoing series on solar module equipment, we look at the different machines involved in PV production. What are they and what part do they play in.
