

Photovoltaic panel export trade

SMART GRID & HOME

Overview

Combined with the latest international trade information in 2025 (such as HS code confirmation, Tax Rebates Adjustments, tariff developments, and quality-standard requirements), we have compiled a practical guide. It is designed to help you conduct business more smoothly and. India is a major supplier of solar panels to the US, with 97% of its module exports, totaling 10.4 GW, destined for the US in the first nine months of 2025. Interestingly, the trade deal came weeks after the US pulled out of the International Solar Alliance, backed by India. "The. China has invested over USD 50 billion in new PV supply capacity - ten times more than Europe - and created more than 300 000 manufacturing jobs across the solar PV value chain since 2011. Tariffs are falling, making Indian solar modules and cells more competitive. This move is expected to drive capacity. Solar photovoltaic (PV) manufacturing involves making a wide variety of products and materials across several manufacturing steps, often done in different locations. It was previously as high as 50%.

Photovoltaic panel export trade

US tariffs, Europe slowdown reshape global solar panels trade

Solar panel exports from Vietnam, Malaysia, Thailand and Cambodia to the U.S. fell by 33% on an annual basis in the nine months since the first round of tariffs in June. In the same period,
