

**PIENAAR ENERGY (PTY) LTD**

# **Photovoltaic panel mounting screw specifications**

## Overview

---

Self-tapping hi/lo thread roofing screws are ideal for mounting solar panels for most specifications because they are available in a variety of sizes and dimensions, including #10 and #12 diameters and lengths from 1-inch to 3-inch in 1/2-inch increments. Specifications and dimensions of photovoltaic mounts are vital for solar panels' optimal performance and longevity. The suitable mounts secure the panels firmly and influence their energy absorption efficiency by positioning them at the ideal angle and orientation. Here are a few key factors to consider when making your selection: 1. Material: Priority is given to weather-resistant stainless steel screws or bolts to ensure that. At its core, a solar mounting system is the supporting framework that secures solar panels to a surface, whether it's a rooftop or the ground. Do NOT tighten with impact gun.
