Photovoltaic panel payback

Overview

Most homeowners save around \$60,000 over 25 years. Calculating your solar payback period is straightforward: Divide the cost of installing your system by the amount of money you'll save each year. A grid-tied system can pay for itself in around 3 to 6 years for DIY projects, and 5 to 9 years if you hire a contractor. Some shoppers break even in five years. Understanding what drives those differences helps you evaluate whether solar makes sense for your home—and which financing option gets you. This concept is referred to as the solar payback period. At NRG Clean Power, we empower customers by providing the. Installing solar panels is a major home improvement project, and like any large purchase it is wise to understand when the investment begins to return value. A payback period gives you a concrete number that connects today's spending with tomorrow's savings.
