

PIENAAR ENERGY (PTY) LTD

Photovoltaic panels connected to metal roof

Overview

Yes, you can put solar panels on a metal roof, and it's an excellent choice for several reasons. Metal roofs are durable, long-lasting, and often come with warranties that match or exceed the lifespan of solar panels. This makes them an ideal pairing for anyone looking to invest. Greentech Renewables has organized crucial insights to help solar installers understand the most cost-effective and safest options when working on metal roof solar installations. While asphalt roofs often only last 12-30 years, metal roofs easily. No-Penetration Installation Advantage: Standing seam metal roofs eliminate the need for roof penetrations, preserving roof warranties and reducing leak risks while enabling 30-50% faster installation times compared to traditional roofing materials.
