

**PIENAAR ENERGY (PTY) LTD**

# **Photovoltaic panels directly attached to glass**

## Overview

---

Short answer: Yes, solar panels can work through glass, but the efficiency drops significantly. Solar glass panels, often referred to as solar windows or transparent solar panels, represent a groundbreaking advancement in renewable energy technology. Unlike traditional solar panels, this glass can be transparent or semi-transparent, making it suitable for use in windows, facades, roofs, skylights, and other. Photovoltaic glass technology is an innovative solution that transforms buildings into energy-producing structures. In this blog post, we examine the history of the technology, its use in buildings, and its advantages/disadvantages, starting with the question of What is Photovoltaic Glass?

We also. Examples of BIPV components and materials currently on the market include: PV glass windows, PV glass skylights, awnings, balustrades, canopies, shingles, exterior wall panels, and even PV walkable surfaces.
