

PIENAAR ENERGY (PTY) LTD

Photovoltaic panels for sewage treatment plants

Overview

Adding commercial onsite solar to a water treatment plant typically means installing ground-mounted and rooftop panels. These capture energy from the sun and transform it into a form of power the facility can use. The installation process requires careful planning. This combination offers a sustainable path forward, turning energy-intensive infrastructure into clean. Wastewater treatment is an essential process that ensures the safe disposal or reuse of wastewater and effluents.

Photovoltaic panels for sewage treatment plants

Photovoltaic system adoption in water related technologies - A review

Wastewater treatment plants are identified to be the most suitable site for photovoltaic module installation and utilization. Among power sectors, hydro power plants are highly compatible ...
