

**PIENAAR ENERGY (PTY) LTD**

# **Photovoltaic panels have fingerprints**

## Overview

---

Depending on location it's not unusual for panels to get dirty during install. Look at the marks from an acute angle and you'll see if it's surface dirt then give it a wipe with a wet sponge; you'll know if it's under the top surface. I am currently in the installation process of Sunpower 345 W AC panels (micro-inverters built on the back Model SPR-X21-345-C-AC). I was told that they have an Anti-Reflective Coatings (ARC) on the panels and thus should not be handled without gloves. Keiichi Komoto, Jin-Seok Lee, Jia Zhang, Dwarakanath Ravikumar, Parikhit Sinha, Andreas Wade, Garvin Heath Dive into the research topics of 'End-of-Life Management of Photovoltaic Panels: Trends in PV Module Recycling Technologies: IEA PVPS Task 12: PV Sustainability'. Together they form a unique. My guess is most people that can afford a 200 mi EV also want to have total voice control over all car functions and be able to play their tunes. JPG Who needs window cranks?

My daily driver for 25 years. 6 watts solar cells, but upon receiving them I notice there are marks that kinda looked like fingerprint (i don't they are though).

### Fingerprints on Solar Panels with Anti-Reflective Coatings (ARC)

I would say that the pollen on your panels is a little more concealing than normal dirt that collects on solar pv. It almost looks like someone spray painted them so I can believe a major increase of ...
