

**PIENAAR ENERGY (PTY) LTD**

# **Photovoltaic panels installed without connecting batteries**

## Overview

---

The short answer is yes: You can absolutely use solar panels without battery storage. In fact, the majority of residential solar installations in the U. are “grid-tied” systems without batteries (although solar + battery systems are becoming more and more common). Solar panel directly powering a load – Source: Electrical. Photovoltaic (PV) modules convert sunlight into direct current (DC) via the photovoltaic effect. When photons hit the semiconductor junction, electrons move and create DC power—this is the raw output of your array. What is this?

Types of Panels: Choose from various solar panel types—monocrystalline, polycrystalline, thin-film, or bifacial—each with. Battery-less solar panel systems, also known as direct solar power systems, operate without the need for energy storage solutions like batteries.
