

PIENAAR ENERGY (PTY) LTD

Photovoltaic panels on the sloping roof of a tile house

Overview

The short answer is yes—but it requires careful planning and the right installation technique to ensure your roof remains intact and your solar system lasts for decades. Let's explore the unique challenges of installing solar panels on tile roofs and the best methods to do it safely. Introduction to Solar Energy Installation on Sloping Tile Roofs Installing solar energy on a sloping roof of a tile house can dramatically reduce energy costs and contribute to sustainable practices. The angle of the slope allows panels to capture sunlight more directly, reducing energy loss. For example, roofs with a pitch of 30 to 45 degrees often perform well for solar harvesting.

 Efficient Higher Revenue

- Max. Efficiency 97.5%
- Max. PV Input Voltage 600V
- 150W Peak Output Power
- 2 MPPT Trackers, 150% DC Input Overvoltage
- Max. PV Input Current 15A, Compatible with High Power Modules

 Intelligent Simple O&M

- IP66 Protection Degree: support outdoor installation
- Smart I-V Curve Diagnosis Function: locate PV string faults accurately and automatically detect faults
- DC & AC Type II SPD: prevent lightning damage
- Battery Reverse Connection Protection

 Flexible Abundant Configuration

- Plug & Play, EPS Switching Under 30ms
- Compatible with Lead-acid and Lithium Batteries
- Max. 6 Units Inverters Parallel
- AFCC Function (Optional): when an arc fault is detected the inverter immediately stops operation
