

**PIENAAR ENERGY (PTY) LTD**

# **Plant area solar power generation sales contract**

## Overview

---

This PPA guide covers everything you need to know about such contracts — from understanding the basics to navigating the complex negotiation process. A Solar Power Purchase Agreement (SPPA) is a financial arrangement in which a third-party developer owns, operates, and maintains the photovoltaic (PV) system, and a host customer agrees to site the system on its property and purchases the system's electric output from the solar services provider. When a solar project is owned by an independent power producer rather than a utility serving its own load, the agreement that provides for an assured source of revenue from the energy output and related environmental attributes of the project is central to the project's viability. In theory, the [A Power Purchase Agreement (PPA) constitute a legal contract between a power producer and power purchaser, commonly referred to as the “seller” and “off-taker”, respectively. The seller. Power purchase agreements are customizable, flexible agreements that enable utility buyers to purchase clean energy, even if the business is not located near the solar generation facility. They can be structured in a myriad of ways, such as through busbar agreements or block delivery. Establishing a steady and predictable income source for both parties is the main objective of a PPA. The purchaser of power could be a power company, power trading company, or individual.
