

## **PIENAAR ENERGY (PTY) LTD**

# **Price comparison of standard power scale belmopan smart pv- ess integrated cabinets**

## Overview

---

Recent pricing trends show standard industrial systems (1-2MWh) starting at \$330,000 and large-scale systems (3-6MWh) from \$600,000, with volume discounts available for enterprise orders. These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO research and development programs. Department of Energy's (DOE) Energy Storage Grand Challenge is a comprehensive program that seeks to accelerate. NLR analyzes the total costs associated with installing photovoltaic (PV) systems for residential rooftop, commercial rooftop, and utility-scale ground-mount systems. NLR's PV cost benchmarking work uses a bottom-up. Europe follows closely with 35% market share, where standardized industrial storage designs have cut installation timelines by 65% compared to traditional built-in-place systems. The tables below compile typical specifications and standardized test metrics for LFP battery packs. LFP achieves ~2,400 cycles at 80% DoD (to ~80% of rated energy). The current price cap is set at \$1,690 for average use dual fuel customers.
