Price of solar panels on factory roofs in Vietnam

Overview

An all-domestic module in Vietnam costs US\$0. If your factory has a usable rooftop area of 500 m² or more and a substantial monthly electricity bill, evaluating the feasibility of installing a rooftop solar system can deliver attractive long-term returns. However, to ensure investment effectiveness, it is critically important to understand the. Unlike residential systems, factory-scale solar installations typically operate at higher capacities (from 50kWp to several hundred kWp), leading to greater economies of scale. The installation cost of home solar systems in Vietnam depends on the system capacity, ranging from 35 to 150 million VND based on kWh. 2025 rooftop solar tariffs are expected.
