

**PIENAAR ENERGY (PTY) LTD**

# **Price trend of Yangneng energy storage lithium battery**

## Overview

---

Reported cell cost range from 162 to 435 \$(kW h)<sup>-1</sup>, mainly due to different requirements and cathode materials, variations from lithium price volatility remain below 10%. They conclude that the thread of lithium price increases will have limited impact on the battery market and future. Lithium carbonate futures were at CNY 160,000 per tonne, trimming the surge that culminated at the over two-year high of CNY 180,000 on January 26th as markets reconsidered the magnitude added demand amid higher power storage investments in major economies. EnergyTrend cross-surveys major buyers and suppliers throughout the supply chain and strives to ensure all enclosed price. TrendForce Lithium Battery Research tracks price trends for major products of China's li-ion battery industry chain, including lithium, cobalt, nickel, cathode/anode materials, separators, electrolytes, copper foils/aluminum foils, and battery cells. This represents a significant recovery from earlier lows, though prices remain approximately 85% below their 2022 peaks of around. In November 2024, the global energy storage lithium battery market continued to perform strongly, especially driven by the demand for large-scale energy storage systems (ESS), and the shipments of related battery continued to grow. Especially in the Chinese market, the advancement of grid.
