

# Prices of the three major solar modules

## Overview

---

There are four main types of solar panels: Monocrystalline panels are highly energy efficient and, as such, cost the most at \$1 to \$1. Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) - Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. TOPCon Technology Dominance: TOPCon modules have. Each year, the U. solar photovoltaic (PV) systems to develop cost benchmarks. 5 kW system, but prices can vary from as little as \$7,700 for smaller solar systems to upward of \$34,700 for larger systems. According to the monthly index published by Germany's pvXchange Trading, the downward trend persists, driven largely—if not entirely—by Asian overproduction. The index focuses on the European market, which pvXchange has been monitoring since.
