## Overview

---

For uninterrupted grid maintenance needs, our mobile energy storage vehicles replace traditional diesel generators, enabling grid-connected/off-grid uninterrupted operation for planned and emergency maintenance—with energy efficiency, cost savings, low noise and zero pollution. One notable trend is the integration of lithium-ion battery systems, which offer higher energy density and longer. The Mobile Energy Storage Power Vehicle (self-propelled) is a truck-based solution utilizing lithium iron phosphate (LiFePO<sub>4</sub>) batteries as its core energy storage unit. Designed with mobility, modularity, and flexibility in mind, the TerraCharge.
