

PIENAAR ENERGY (PTY) LTD

Progress of Photovoltaic Panel Theft

Overview

According to Spotter Global, theft from solar farms was expected to rise throughout 2024, with growing demand for panels making them both easier to sell and more valuable to steal. This certainly seemed to be the case, as between January and August 2024, there were at least 70 reported offences. Compact surveillance radars can help secure solar farm perimeters from rising incidents of solar panel theft. It is truly impressive to see how far solar energy has come in the last few years. What's less inspiring is the growing rash of solar panel theft (as well as the theft of other solar farm. According to the International Energy Agency (IEA), global solar photovoltaic (PV) capacity has been growing at an average annual rate of around 33% over the past decade. The United States, for example, has approximately 2,500 solar farms alone while the UK's installed solar capacity hit 15 GW with more than. With copper prices rising, inflation driving up the cost of living, and organized criminal gangs stepping up operations in the United Kingdom and across Europe, solar project owners need to be more conscious than ever of security. A DeterTech PID360 (perimeter intrusion detector) CCTV unit.
