

PIENAAR ENERGY (PTY) LTD

Proportion of new energy storage BESS in Italy

Standard 20ft containers

Standard 40ft containers

Overview

Some 95% of the new resources were 'electrochemical storage', transmission system operator (TSO) Terna said, which means batteries or battery energy storage systems (BESS). That implies a figure of around 564MW. The “Storage systems observatory” report published by Italian electronic industry body Anie states more energy storage capacity. Octo: Battery storage capacity in Italy surged more than 55% year-on-year toward the end of summer, totalling over 17GWh, according to latest data. Italy becomes the 2° largest market with 6GWh installed Europe now counts 61. A new year brings continued. BESS technology has won the bulk of new resource contracts in the capacity market (CM) auction for delivery in 2027 in Italy. The auction took place last week (26/27 February) and awarded 38,057MW of obligations to existing resources and 594MW to new resources, alongside 4,365MW to resources. Italy has taken the first step in locking in 50 GWh of storage through MACSE, its long-term capacity scheme for energy storage, cementing its status as one of Europe's most attractive fixed-revenue markets. Even with substantial contracted capacity coming online, and more to follow, merchant. The EU installed a record-breaking 27. 1 GWh of new battery energy storage system (BESS) capacity in 2025, with Germany and Italy topping the chart again, while Bulgaria emerged as the fastest-growing market.

Proportion of new energy storage BESS in Italy

Italy Energy Storage

Italy will promote investments in utility scale electricity storage to reach at least 70 GWh, and worth over Euro 17 bn, in the next ten years. The new storage capacity will be acquired through ...
