

PIENAAR ENERGY (PTY) LTD

Replacement of new energy battery cabinet module

 LFP 12V 100Ah

Overview

This manual describes the procedure for replacing the energy module for the CSS OD. There are two versions of the system: On-grid system and the Backup Interface (BUI) system. We can help you get the right battery storage cabinet to match your new UPS. Whether leveraging an existing battery cabinet through a retrofit or opting for a new cabinet altogether, you'll also need to consider connector compatibility, cable size and the possibility of re-wiring. The cabinet is supplied without batteries, so batteries must be purchased separately. With high-density lithium-ion battery modules and an integrated battery management system (BMS), Vertiv EnergyCore provides safe, reliable runtime while simplifying installation, service, and monitoring.

Replacement of new energy battery cabinet module

Vertiv EnergyCore Battery System

Best-in-Class Serviceability Front-facing, retractable shelf design enables fast, tool-free battery module replacement.
