# **Reykjavik Island Power Station Solar Air Conditioning**

## Overview

---

Space Solar will partner with Icelandic climate solutions initiative Transition Labs to send power from its debut facility to Reykjavik Energy — adding solar to the island nation's renewable energy mix. The Reykjanes power station (known as Reykjanesvirkjun ['rei:ca,nəs,virçyn]) is a geothermal power station located in Reykjanes at the south-western tip of Iceland. As of 2012, the power plant generated 100MWe from two high pressure 50MWe turbines, using steam and brine from a reservoir at 290 to. That's exactly what Reykjavik Solar Air Conditioning achieves. This technology targets environmentally conscious homeowners and businesses in Nordic regions, particularly those seeking to: Traditional AC units guzzle energy like thirsty reindeer in July.

Facts  
Learn More About Iceland's Energy Transition  
Landsvirkjun, the National Power Company of Iceland, invites participants of CHARGE to a Magnet Networking Excursion to the Ljósafoss Power Plant. The excursion will serve as a grand finale of CHARGE 2018 on the 25th of September. After the conference programme concludes, participants will go straight to buses that will take them on an energy excursions. See more on [leadersinenergy](#)
