Our insights help businesses to make data-backed strategic decisions with. The data and information that are available in the ERC were mostly provided by the government ministries, agencies, and departments, that have responsibility for statistics and planning, in general, and the energy sector and electricity subsector including the electric utilities, in particular. It's useful to look at differences in energy consumption per capita. The islands generate nearly all their electricity through inefficient diesel generators, which has prompted the government to pursue initiatives aimed at. I am also committed to the goal of 100 percent of our electricity being supplied from the optimum mix of renewable sources such as geothermal, solar PV, wind, and waste-to-energy. These commitments will be realized through several legislative, policy, regulatory, and incentive initiatives. These. This report elaborates St.
