

PIENAAR ENERGY (PTY) LTD

Samoa green electricity

Overview

Samoa has launched an ambitious renewable energy initiative aimed at reducing reliance on fossil fuels and transitioning to 100 per cent renewable electricity generation by 2025. The project is part of Samoa's broader commitment to combat climate change and achieve energy independence. We specialize in the investment, development, and construction of solar photovoltaic (PV) power stations for residential, commercial, and large-scale applications. Established in 2007, RED has emerged as a beacon of change among the 15 dynamic divisions. In an interview with the Samoa Observer, E. The remaining 40% is supplied by low-carbon sources, featuring hydropower at 20%, solar power at roughly 13%, and biofuels accounting for around 7%. This blend of energy sources. As part of the ambitious Greening Moonshot Initiative aiming to cut the carbon emissions of UNDP by half by 2030, UNDP Samoa recently made a significant investment in sustainable transportation.
