Photovoltaic panel short circuit protection principle

In principle the PV inverters are able to supply more short circuit current during fault scenarios than only 1 p.u. reactive current due to current reserve margin of the inverter system.

Components Required SK100B PNP Transistor Short Circuit Protection Circuit Working of Short Circuit Protection Circuit A simple low power DC Short-circuit Protection Circuit is shown above which consists two transistor circuits, one is BC547 NPN transistor circuit and other is SK100B PNP transistor circuit. The input is provided to the circuit using a 5V DC Power supply, which can be either provided by some battery or using transformer. The working of the circuit i See more on circuitdigest publishers-right [PDF]
