### Tank Thermal Energy Storage

Fig. 6.2 shows the schematic diagram of a TTES. In the charging cycle, the cold water is sent to the heater (a solar collector module here, as an example) from the bottom of the tank and injected from ...

## Illustration of Solar Water Heater System Design

In summary, a solar water heater system captures solar energy through a solar collector, transfers it to a heat transfer fluid, and then to the water in a storage tank through a heat exchanger.

## Schematic diagrams of Solar thermal systems for hot water, space

After having stored the energy for domestic use, the surplus energy is transmitted to a downstream storage tank via the secondary heat exchanger. This storage tank contains hot water used for heating.
