

## PIENAAR ENERGY (PTY) LTD

# Singapore energy storage for backup power

## Overview

---

Sembcorp has successfully piloted a battery stacking solution at the nation's largest operating battery energy storage project, while Mitsubishi has announced plans for Singapore's first battery-backed combined cycle gas turbine (CCGT) power plant. Energy Storage Systems act like giant batteries that store excess energy for future use. While there are economic and technical factors to consider in deploying Energy Storage System (ESS), it can also bring multiple benefits to the power system and consumers: It facilitates the integration of. SINGAPORE: Singapore's power grid is expected to become more complex as demand for electric vehicles (EVs) grows and renewable but intermittent energy sources are introduced into the system. To prepare for this shift, the Energy Market Authority (EMA) on Wednesday (Oct 29) launched a roadmap. Singapore has surpassed its 2025 energy storage deployment target three years early, with the official opening of the biggest battery storage project in Southeast Asia. This gives you greater energy control, cost savings, and reliability across any site type in.
