Solar System Example

Overview

Astronomers sometimes divide the Solar System structure into separate regions. The inner Solar System includes Mercury, Venus, Earth, Mars, and the bodies in the asteroid belt. The outer Solar System includes Jupiter, Saturn, Uranus, Neptune, and the bodies in the Kuiper belt. Since the discovery of the Kuiper belt, the outermost parts of the Solar System are considered a distinct region consisting of

Solar System Example

What is a non-example of the solar system?

What are the words start with solar?
Some examples of words that start with "solar" are solarium, solar panel, solar system, and solar energy.
