

PIENAAR ENERGY (PTY) LTD

Solar energy for the environment seychelles

Overview

Over the next seven years, the program will support Seychelles' energy transition by scaling up renewable energy, reducing carbon intensity, and unlocking private sector investment through grid modernization, regulatory reforms and targeted technical assistance.

WASHINGTON, J— The Republic of Seychelles is taking a major step toward a more sustainable and resilient energy future with the launch of the Seychelles Renewable Energy Acceleration Program (REAP), approved by the World Bank's Board of Executive Directors on . The Seychelles enjoy favourable conditions for renewable energy (RE) resources, such as. In a significant leap towards a sustainable energy future, Seychelles has officially completed a new 10-megawatt (MW) solar farm on its main island, Mahé. The use of solar energy will reduce energy costs and create jobs related to the construction and maintenance of the farms. According to the World Bank, the success of social programs has contributed.

- Seychelles signed a 25-year power purchase agreement with France's Qair for a 5.
- The project, Seysun Lagoon Floating PV, is financed by a \$5. 7 million senior loan from the Facility for Energy Inclusion (FEI).

As a small island state, Seychelles faces severe climate risks, but it also has.
