

PIENAAR ENERGY (PTY) LTD

Solar energy policy malta

Overview

Malta introduces a new policy requiring solar panels on buildings reaching the maximum height limit, aiming to boost renewable energy and reduce reliance on fossil fuels. Learn more about its impact and benefits. Backed by legally binding targets, a clear regulatory structure, and support schemes for both households and businesses, Malta's energy transition is shaped. Malta's renewable energy legislation is largely shaped by European Union directives, adapted locally to suit the island's unique geography and energy needs. This initiative aims to increase the share of renewable energy in the country's energy mix. A €10 million investment to shift to renewable energy; additional benefit for Gozo households Over €10 million investment in renewable energy grants will support households in their shift to sustainable energy. This was announced by the Minister for Energy Miriam Dalli, who explained that this. The government of Malta launched new grant schemes for 2025 to incentivise the use of renewable energy as part of the €10.
