

PIENAAR ENERGY (PTY) LTD

Solar energy research and development bulgaria

Overview

Bulgaria's energy sector is at a critical juncture, with two main objectives shaping its direction: decarbonization and reducing reliance on Russian energy. Over the past year, Bulgaria has made considerable progress in expanding its renewable energy capacity. The Central Laboratory of Solar Energy and New Energy Sources (CL SENES) is a research center for fundamental and applied research in the field of solar energy transformation in Bulgaria. CL SENES - BAS was founded with a decree of the Council of Ministers of Bulgaria dated 01. While a draft strategy exists, it lacks support for decentralised renewable projects. Incentives do include a solar rebate scheme, but. Entra Energy has been successfully developing RES in Europe for more than 10 years across all renewable sources - solar, hydro and wind. Driven by our business strategy and ambitions to support the transformation of the. Bulgaria installed over 1 GW of solar for the third consecutive year in 2025 and is forecast to add over 2 GW this year thanks to a large pipeline of utility-scale projects. Bulgaria added 1,416 MW of solar last year, according to official data published on the ENTSO-E Transparency Platform. The Tenevo plant is expected to generate more than 300 GWh of electricity a year and.
