

PIENAAR ENERGY (PTY) LTD

Solar energy research and development laos

Overview

In a determined push to secure energy stability, Laos is intensifying efforts to expand its electricity infrastructure through ambitious hydropower and solar projects. The Renewable Energy Development Strategy in Lao PDR was issued in 2011 and it aims to develop new renewable energy resources which are not yet widely explored in Lao PDR to replace resources that will be exhausted in the future, also known as “non-renewable energy”. The Strategy firstly provides. Laos has large-scale hydropower capacity but still faces rural electrification challenges, which creates growing demand for solar energy, particularly in off-grid and remote areas. In Laos, recent milestones such as the 600MW Monsoon Wind Farm and the nearly complete 1GW Northern Clean Energy Project underscore the country's momentum in scaling renewable energy. Electricite du Laos (EDL), the state-owned power corporation, has unveiled plans to launch new energy initiatives and upgrade the. This chapter should be cite as: Phongsavath, A. (2024), 'Renewable Electricity and Energy Transition in Lao PDR: Opportunities for Green Hydrogen and Ammonia', in Phoumin, H.
