# Solar energy storage battery expansion

**Higher Anti-Rust Performance  
Lower Internal Impedance**

## Overview

---

Together, solar and battery storage account for 81% of the expected total capacity additions, with solar making up over 50% of the increase. We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U. This expansion is primarily fueled by supportive industrial policies like the Inflation Reduction Act and the inherent economic advantages of these technologies. Cross-border partnerships are emerging as a powerful catalyst in the global clean energy transition, significantly accelerating the deployment of utility-scale solar and energy storage projects across multiple regions. International collaborations between developers, investors, technology. KITCHENER, ON, Feb. 5, 2026 /PRNewswire/ -- Canadian Solar Inc.
