## Analysis of SVG Function with PV Inverter

1. Reactive power trend direction of photovoltaic power station
2. Introduction to existing SVG compensation schemes
- 2.2. SVG equipment composition and advantages
  - (1) Main equipment composition SVG equipment is mainly composed of the linking groups of reactors (the linking groups of transformers), starting device, IGBT

valve set and control system.4. The conclusionWelcome visiting GoodWe Solar Community (community.goodwe )At present, most photovoltaic power plants adopt the scheme of installing SVG reactive power compensation devices. Because the reactive power compensation adjustment device of SVG has smooth voltage control ability and short response time. Even in the case of undervoltage, the compensation capability is very strong, which can improve the performanc See more on community.goodwe scribd
