

**PIENAAR ENERGY (PTY) LTD**

# **Solar panel power is too low**

## Overview

---

Environmental factors cause 70% of solar production issues: Weather, shading, and dirt accumulation are the most common culprits behind reduced solar output, making regular monitoring and maintenance essential for optimal performance. 8% annually: Quality solar panels. Solar panels are meant to quietly do their work turn sunlight into savings. So when your solar monitoring app shows lower numbers than expected, it can feel confusing or even alarming. Many homeowners and businesses with solar systems experience dips in performance—but the good news is that most issues are fixable without needing a full replacement. Sometimes 300–350 W, sometimes even 250–280 W.
