Solar panel prices remain flat

Overview

China's efforts to rein in photovoltaic (PV) oversupply are unlikely to meaningfully reduce existing overcapacity and global solar panel prices are expected to stay low through much of 2025, according to a new report from US-based advisory firm Clean Energy Associates (CEA). China's efforts to rein in photovoltaic (PV) oversupply are unlikely to meaningfully reduce existing overcapacity and global solar panel prices are expected to stay low through much of 2025, according to a new report from US-based advisory firm Clean Energy Associates (CEA). Somewhere in the tumult of the global economy in recent months, solar panel prices hit bottom and then began to rise. The oversupply that helped to push prices down last year has eased a bit. EnergySage has released its 20th semiannual report, showing that residential solar panel prices hit an all-time low in 2024. Analyzing millions of transaction-level data points from homeowners on EnergySage, it highlighted a clear milestone for solar panels: The average price had dropped 30%. The global solar market is experiencing dynamic shifts, characterized by record-low prices for PV modules and significant growth in deployment, especially in the US 7 9. This downward trend in pricing, driven by substantial module overcapacity and aggressive pricing strategies by installers, makes. Inside Climate News reported that the price for solar panels has consistently decreased, despite the short-term increase during the COVID-19 pandemic. With a significant increase in the percentage of clean energy contributing to the global electricity supply, and a 30% tax credit for.
