

## Overview

---

The Cartersville plant is slated to begin operations in 2024 and will manufacture solar ingots, wafers, cells and finished panels. Solar panels built from the two Georgia sites could reduce over 12 million tons of CO2 equivalents per year, Qcells said in a statement. Spanning from large manufacturing firms producing high quality photovoltaic. The facility received a \$1. Courtesy of Hanwha Group This audio is auto-generated. The company operates recycling.
