### Solar explained

Energy from the sun The sun has produced energy for billions of years and is the ultimate source for all of the energy sources and fuels that we use. People have used the sun's rays (solar radiation) for thousands of ...

## How the components of solar power systems work

Solar power systems can generate, store, and share clean, sustainable electricity using only a few key components--and a lot of sunlight--for 25 years and more.

## Solar Integration: Solar Energy and Storage Basics

Solar power can be used to create new

fuels that can be combusted (burned) or consumed to provide energy, effectively storing the solar energy in the chemical bonds.
