

**PIENAAR ENERGY (PTY) LTD**

# **Solar power generation ground grid**

## Overview

---

A ground mounted solar power plant is a solar photovoltaic (PV) system installed directly on the ground. In today's electricity generation system, different resources make different contributions to the electricity grid. This fact sheet illustrates the roles of distributed and centralized renewable energy technologies, particularly solar power, and how they will contribute to the future electricity. For homeowners with roofs that aren't ideal for solar—due to shading, poor orientation, or structural concerns—ground mount solar design offers a high-performance alternative. These systems are typically used in open, unshaded spaces, such as fields, industrial areas, or unused land, allowing them to capture sunlight without any obstruction.
