# **Solar power generation in rural Vietnam**

## Overview

---

In a groundbreaking move to merge renewable energy with agricultural innovation, Vietnam has launched its first research initiative to integrate solar power into rural farming practices. Unveiled on September 9 in Hanoi, the Agri-photovoltaics for Rural Areas in Vietnam (Agri-PV) project aims to. Agrivoltaics, which integrate solar energy production on agricultural land while allowing for simultaneous crop production, present a unique solution to land tensions between rapid renewable energy expansion and food production. In an effort to meet its commitment to achieving net zero emissions by. The Agri-PV project sets a target of deploying at least 10 pilot models for agricultural solar plants during its three-year implementation from 2025 to 2027.
