Solar power generation system is a pitfall

Overview

The technology accounted for two-thirds of the world's new electricity capacity and two-fifths of new generation in 2024, according to the thinktank Ember. Yet, this rapid expansion has triggered a backlash, with numerous campaigns springing up to oppose new solar projects from the. Solar energy is far from being reliable compared to other energy sources like nuclear, fossil fuels, natural gas, etc. Since solar energy depends on sunlight, it can only produce energy in the daytime. Solar energy works through. What is the pitfall of installing solar energy called?

The challenge associated with installing solar energy systems is referred to as “solar energy saturation. This phenomenon results from an oversupply of energy relative to the local demand, causing inefficiencies. However, despite its undeniable advantages, there are also several arguments against its widespread implementation and use.
