

Overview

The facility comprises more than 81,000 solar panels and 158 inverters, along with a 5MWh battery energy storage system (BESS) Over 270,000 homes are set to benefit from Chad's first utility-scale solar power plant with battery storage, now officially in operation. Chad has one of Africa's highest solar penetration rates, a result of a small power system with just 12% electrification, as large-scale solar and storage projects gather pace around N'Djamena, even as political uncertainty over oil revenues constrains faster deployment. GSU inaugurates the Noor Chad solar-storage site in Chad. Image source: Global South Utilities (GSU). It was delivered under a leasing model, making it the first of its kind in the country, which has one. The Noor Chad PV plant, Chad's first utility-scale PV facility featuring 81,000 modules, 158 inverters, and a 5 MWh battery, was inaugurated by Global South Utilities. Image. As part of the implementation of the Chad Energy Access Expansion Project (PAAET) – part of the Mission 300 initiative – 145,000 solar kits are being distributed at subsidized rates to households across the country's 23 provinces. Each kit, valued at \$100, is sold for the equivalent of \$20.

Solar power storage in China in Chad

Chad's installed PV capacity hits 110 MW, supplying 37% of electricity

Chad has one of Africa's highest solar penetration rates, a result of a small power system with just 12% electrification, as large-scale solar and storage projects gather pace around N'Djamena
