Solar power system batteries in Dominican-Republic

Overview

With solar and wind projects expanding rapidly, battery storage has become the missing puzzle piece to maximize renewable energy adoption. Did you know?

Over 18% of the country's electricity now comes from renewables – but without storage, this potential remains underutilized. Founded in 2008, EcoDirect is a value added distributor that helps Dominican installers, do-it-yourselfers (DIY), homeowners, businesses and commercial projects in Santo Domingo, Santiago, Punta Cana, La Romana and throughout the Dominican Republic with project design, supply, logistics and. In a significant move to modernize the national power grid, the Unified Council of Electricity Companies (CUED) has unveiled a public tender for up to 600 megawatts (MW) of new renewable energy generation. Marking a national first, the bidding process mandates the inclusion of battery energy. A notable achievement is the upcoming launch of the first four-hour energy storage system linked to a solar project, set to be operational by mid-2025. 8MW/99MWh battery energy storage system (BESS). Battery swap time: 5 minutes from house to.
