

PIENAAR ENERGY (PTY) LTD

Somaliland Communication Base Station solar Power Supply

Overview

The project involves the design, supply, installation, testing, and commissioning of a 10 MW solar photovoltaic (PV) plant integrated with a 20 MWh battery energy storage system (BESS) and a 33 kV evacuation line. Can solar energy be used in Somalia?

In a real case study, a solar photovoltaic system in Somalia achieved a performance ratio of 70. Recommendations have been provided to increase the utilization of solar energy in Somalia. Based on the extensive review conducted by the authors, no previous study. The Government of Somaliland (GoSL), is preparing the Somaliland Electricity Sector Recovery Project (SESRP) to be financed by International Development Association IDA to the tune of US\$50 million. The SESRP aim is to increase access to electricity services and to re-establish the Electricity. The power generated by solar energy is used by the DC load of the base station computer room, and the insufficient power is supplemented by energy storage. This article provides a design for a solar-power plant to feed the mobile station. Also, in this article is a prediction of all loads, the power consumed, the number of solar panels used, and solar batteries can be used to store electrical energy. The government of Somalia has rolled out tender to for the development of a 10 MW.

Somaliland Communication Base Station solar Power Supply

Somaliland solar container power station project progress

The government of Somaliland requests bids for design, supply, installation, testing, and commissioning of an 8 MW dc / 6.8 MW AC solar PV power plant with 20 MWh of battery energy
