

PIENAAR ENERGY (PTY) LTD

South ossetia battery safety

Overview

In early 2023, a thermal runaway event at a battery energy storage facility in South Ossetia caused widespread power disruptions. The accident, linked to outdated voltage regulators and insufficient cooling systems, highlights critical challenges in energy storage safety. While Li-ion batteries are considered relatively safe among consumers, their thermal stability can be compromised under certain conditions. Testing for a battery module or pack is not so much focused on the internal dynamics of cells or their chemical.
