# **Specifications for three-phase photovoltaic integrated energy storage cabinet for highways**

## Overview

---

Equipped with a robust 15kW hybrid inverter and 35kWh rack-mounted lithium-ion batteries, the system is seamlessly housed in an IP55-rated cabinet for enhanced protection against water and dust, ensuring reliable performance in various environments. It features 10 integrated MPPTs, each supporting a string current of up to 21A - ensuring exceptional power delivery. Designed for both on-grid and off-grid. f photovoltaic, battery, and load. Prioritize the allocation of photovoltaic energy to energy storage batteries or load power supply through intelligent algorithms to meet the needs of m it include isolation transformer?

Yes Optional offline function: supported Fire protection system:. The Cabinet offers flexible installation, built-in safety systems, intelligent control, and efficient operation. DC coupling, full fault protection, low battery cycling, auto current sharing, and fast delivery with. The system has been commercialized, integrating energy storage batteries, energy storage converters, photovoltaic converters, energy management monitoring systems, power distribution systems, environmental control systems, and fire control systems. It can fully control the operation status and.
